Initial Treatment for Jacuzzi True Water Care

(Use these steps when water is drained and refilled)

- Add ½ bottle of METAL CONTROL
- Add 4 Oz. of 4-1 CLARIFIER or UNIQUE
- Wait until the spa is at its set temperature
- After 24 hours pull out & rinse filters
- Replace the large filter with the micron filter
 - Micron filter goes on the right, large filter goes on the left if standing over the filters
- Check and adjust the pH to read between 7.2 and 7.8 using test strips
- Add 2 tablespoons of DICHLOR GRANULAR
- Add recommended amount of AQUAFINESSE or JACUZZI PROCLEAR

Jacuzzi
True Water
